Standards & Specifications

HTML

- Code is written under XHTML 1.0 Strict - including the use of Cascading Style Sheets (CSS) - guidelines set forth by the World Wide Web Consortium (W3C). For more information, please refer to <http://www.w3c.org>

Browsers

- Support for HTML 4-compliant versions of the following Web browsers are tested for compatibility on both the Macintosh and Windows operating platforms:
 - Internet Explorer 5.5 +
 - FireFox 1.x +
 - Netscape 6 +
 - Mozilla 1 +
 - Opera 5 +
- *We no longer support Netscape 4.x*

Resolution

- Sites will be designed to fully display within a screen resolution of 800x600 or greater, unless specific requests are made by the Client.
- Sites can be either fixed-width or flex-width.

Accessibility

- Whenever possible (given a Client's business requirements), sites are developed to **Level AA Compliance** the Web Content Accessibility Guidelines set forth by the World Wide Web Consortium (W3C). For more information on accessibility, please refer to <http://www.w3.org/WAI/>.

Graphics

- Color Cube colors ("Web-safe" colors) will be used as much as possible for graphic design and CSS.
- Images/graphics will be displayed using .GIF and .JPG formats.
- Photographs will be displayed using 24-bit .JPG
- Support for other formats, including Flash (.SWF), Portable Network Graphics (.PNG) and Scalable Vector Graphics (.SVG) is available upon request.

Audio/Video

- Audio and video produced will be in the **FLV (Flash Video)**, **MP3/MPG** or **Quicktime (.MOV)** format. Other formats, including Real Audio (.RM) or Windows Media may be requested but may not provide cross-platform compatibility.
